

Lego Gummies

Ingredients

- 1/2 cup cold water
- 1/4 cup Karo Light Corn Syrup
- 2 packets of Knox Gelatine unflavored
- 1 box of Jello 3oz size

Other Items

- Silicone Lego Molds you can find these at the Lego store or sets of similar molds on Amazon
- Medium pot
- Whisk, Measuring cup and spatula
- Plastic dispensing bottles (recommended). We found these at Walmart for a \$1 each.

Steps

Mix until fully dissolved before turning on the heat.

- Put half cup cold water into a small bowl or in a measuring cup.
- Add 1/4 cup Karo syrup and mix well. A small whisk works well. Add to pot, do not turn on the heat yet
- Add two packages of Knox Gelatin and the package of Jello.
- Mix until **completely** dissolved
- Turn on heat to med low and stir frequently for about 6-8 min
- Pour into the measuring cup and let cool 5-10 minutes and skim the top with a spatula and discard
- Pour into a dispenser bottle for easiest way to fill the molds
- Lay the molds on a cookie sheet for easy transporting to the refrigerator
- Slowly pour into each of the molds until it completely fills each cavity.
- Let cool in refrigerator for about 6 hours and then pop out of mold and store in container. Refrigerate to keep fresh.
